DRINKING WATER SYSTEM

WeißGELB®

For at home and when on the road. Everywhere.

WaTu® by CERTEC®
Mini filter capsules

LILIE.COM

WaTu® by CERTEC®

The small filter capsule for drinking bottles, drinking containers and sports hydration packs for on the go, whether you're cycling, hiking or walking – wherever you value pure, filtered water! It provides you with good, clean water.

Unique and high-quality materials for pure water quality

CERTEC® ceramic: the natural barrier

The porous structure of the CERTEC® ceramic imitates the natural filtration processes of spring water. With a surface area of 1,050 m², it attracts bacteria like a magnet and eliminates them at its sharp edges.

Bioelectro-DEPOT: antibacterial activation

The LILIE LV1098 method generates a weak electric current of 0.06 mA, which releases negative ions. These ions attach themselves to germs, have an antiseptic and antibacterial effect and vitalise the water with mineral microelements.

Self-regulating: perfect metering

The system always ensures optimum metering without the risk of over- or undermetering.

How you benefit:

- + Keeps drinking water fresh
- + Mineralises and vitalises the water
- + Water can remain in the container (up to 3 l) and only needs to be topped up
- + Revitalises up to 3,000 litres of water
